

Aspen outbreak update 9 – Sunday, September 19, 2021

This information is current as of Sept 19 at 8:37 a.m.

To all Aspen residents and primary contacts

Hello,

Great news: the Calgary Zone Medical Officer of Health has declared the COVID-19 Outbreak at Aspen is over!

Thank you to residents and families for your co-operation while we were in outbreak. Thanks to our employees for their extra efforts during this time.

Let's stay out of outbreak

Today's news is a relief. Yet we know despite our many precautions, COVID-19 and its variants are unpredictable, and Calgary is a hot spot. Vigilance remains critical in preventing the virus and its variants from re-entering. Wear a surgical mask, wash/sanitize your hands and physically distance.

Silvera continues to strongly recommend that everyone – including residents, visitors, and employees – get vaccinated.

A reminder about visitors

Please schedule your indoor visits in advance with Reception. Thanks for your patience.

Actions continuing

- Alberta Health Services screening procedures at the community entrance remain in place.
- Monitor for COVID-19-like symptoms. Let Reception know if you are experiencing any symptoms.

Thanks for your continued support and kindness. Stay healthy and safe,
Vinod Nirwal, Community Assistant Manager (vnirwal@silvera.ca)
