

Spruce outbreak lifted – Friday, Oct. 8, 2021

This information is current as of Oct. 8 at 10:22 a.m

Hello Spruce residents and primary contacts,

I'm very thankful to let you know this morning the Calgary Zone Medical Officer of Health (MOH) declared the Confirmed COVID-19 Outbreak at Spruce community to be over. A big thank you to residents and family members for your co-operation while we were in outbreak, and to employees for their support.

As we all know, our outbreak situation can change at any time, despite our many precautions. We must continue to be vigilant in our combined efforts to minimize the spread of viruses in our community.

Residents should continue to wear masks anytime they are outside of their suites. Please also continue washing your hands and distancing from others. Silvera continues to strongly recommend that everyone – including residents, visitors, and employees – get vaccinated.

Actions continuing

- Alberta Health Services screening procedures at the community entrance remain in place.
- All residents should continue to self-monitor each day for any COVID-19-like symptoms and advise an employee or Reception if you have any.

On behalf of all Spruce employees, thank you for your patience and cooperation during the past few weeks.

Wishing you a wonderful Thanksgiving!

Sharon Milanko, Community Manager, on behalf of Peter Lawrence
