

## **Beaverdam outbreak update 2 – Sunday, January 2, 2022**

*This information is current as of January 2 at 11:30 a.m.*

Hello Beaverdam residents and primary contacts,

I am writing to update you on the current outbreak status at Beaverdam. The GI (gastrointestinal) outbreak continues today with 14 Residents now symptomatic. We are assisting the affected residents and asking them to isolate in their suites.

Please note: there were no positive Covid results from the recent Covid swabbing that was completed at Beaverdam.

Visits are still permitted with non-isolating residents. Visitors and residents must wear masks for the duration of all visits. Visitors must provide proof of full COVID-19 vaccination before entering community. If this is not possible, please consider virtual visits instead.

We continue to check in consistently with each resident. All outbreak protocols remain in place; AHS screening procedures continue at the community's entrance and all employees continue to wear personal protective equipment.

Please remind your loved one that all residents must wear medical grade masks, as much as possible, when they are outside of their suite or while another person is inside their suite.

We will provide another update as soon as possible if any significant changes occur. Otherwise, outbreak updates will be provided in the coming days on a regular basis until the outbreak is resolved.

If you are a designated primary contact and have questions, you may contact me at [tbowen@silvera.ca](mailto:tbowen@silvera.ca).

With thanks for your support,  
Tim Bowen, Community Manager
